Abrasive Wheels

Abrasive Wheels

T. +44 (0) 7759 151276

Thousands of people every year suffer from various injuries from using Abrasive Wheel at work which could have been easily minimised if a lot more people had known the basic principles in the safe use of Abrasive Wheels.

This is not to replace any formal practical training, but provides an excellent guide to refreshing your knowledge and updating your skills using and mounting Abrasive wheels safely. As this course will not qualify anyone in anything.

Who is this training for?

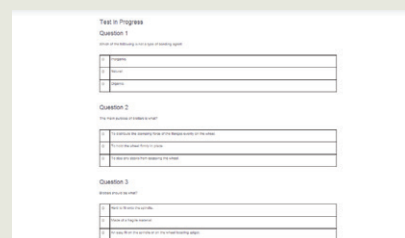

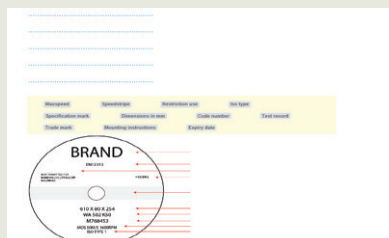

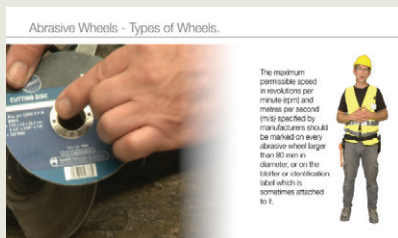

If you use Abrasive Wheel machine but haven't been shown how to safely mount or use Abrasive Wheel machinery then this course is for you. Providing extensive information in the safe use and working practices with Abrasive Wheels.

What does the course cover?

This course will teach users the safe use of machinery that performs cutting and grinding with the use of discs and wheels, the dangers involved with such machinery and what you can do to try and help prevent injury or even worse, death when performing certain, dangerous tasks.

What is the benefit to your business?

This will train your staff the basic principles of the safe use in Abrasive Wheels and know how to deal with the unlikely situation of someone being critically ill. This will allow you staff to train at any time to suit your needs.

Video Presentations.

Interactive games.

Final exam - certificates provided.

“If someone is using any type of abrasive wheel machinery then that person should be fully trained and qualified to do so. If that person is being trained then they must be supervised by a fully qualified and competent person.”
