Asbestos Awareness

T. +44 (0) 7759 151276

As this course is designed to help protect you and others from Asbestos exposure. The course will demonstrate and show examples of areas that have had Asbestos within certain perimeters. If you think that you have found an area of a building that consists of Asbestos you should treat this with some urgency and inform your employer.

This course is purely for general guidance and you should always follow all codes, practises and regulations that are in place for Asbestos awareness. Also know what your working practices, policies and procedures are for dealing with Asbestos.

Who is this training for?

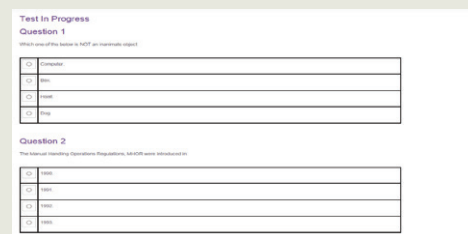

Do you know what codes, working practises and regulations are in place for Asbestos? Do you know the different types of asbestos? No? Well do not worry as our Asbestos Awareness course does cover these vital points and much more. If you need basic awareness to gain access to certain sites, then this is the course.

What does the course cover?

This course will look at the basic principles of Asbestos awareness, however after completing this course you will not be permitted, licensed or authorised to remove or repair any Asbestos under any circumstances.

What is the benefit to my business?

Making sure that you and your staff can gain quick but effective training in Asbestos awareness, gaining necessary knowledge when dealing with Asbestos materials.

Video Presentations.

Interactive games.

Final exam - certificates provided.

“There still remains over 1000’s of tons of Asbestos in buildings across the UK.”

“Shockingly over 4’500 people die from Asbestos related diseases each year.”
